SUMMARY

Detail-oriented Information Technology professional and freelance developer with experience building comprehensive web, mobile, and desktop applications. Adept at managing end-to-end project lifecycles, from database design to deployment. Strong problem-solving skills coupled with the ability to deliver custom, efficient technical solutions for clients.

TECHNICAL PROJECTS

Enterprise Point of Sale (POS) System

- Engineered a robust offline POS solution using C# and SQLite, integrating barcode scanning to streamline checkout and inventory management for physical storefronts.

Barangay Information Management System (BIMS)

- Developed a comprehensive data management system for local government units, building secure administrative functions and database structures for efficient resident profiling.

Web-Based eVote System

- Designed and deployed a secure full-stack voting platform, handling both the frontend UI design and the backend administrative dashboards for organizational use.

WORK EXPERIENCE

Independent IT Service Provider 2024 – Present
R-TECH SOLUTIONS (Freelance)

- Deliver custom software, web development, and mobile applications to clients while providing advanced technical support and operating system management.

Freelance Web Developer 2024 – Present
Various Clients (Remote)

- Designed user-friendly interfaces using HTML and CSS while implementing strict maintenance protocols and conducting code reviews to ensure optimal site functionality, security, and performance.

Preschool Teacher 2022 – 2024
Christian Baptist Learning Center

- Implemented engaging lesson plans that accommodated various learning styles and facilitated activities that promoted teamwork, leadership, and personal growth among students.
